

Title: Generic circumscriptions within the Cape endemic tribe Stilbeae (Stilbaceae)

Description: This project will expand on the phylogenetic framework of this Cape endemic tribe (Kornhall, 2004). The current phylogenetic data suggests that the genera are not monophyletic and so the generic circumscriptions and taxonomic keys need to be re-assessed.

Field: Taxonomy

Supervisors: Prof. J.C. Manning (SANBI), Prof. J.S. Boatwright (UWC), Dr A.R. Magee (SANBI)

University for registration: University of the Western Cape

Level: BSc Hons.
