

Title: Survey of morphological characters across the southern African Thymelaeaceae

Description: This project will focus on a survey of vegetative and floral characters across the Thymelaeaceae in southern Africa, particularly the polyphyletic genus *Gnidia*, to assist with the identification of synapomorphies for the eventual re-circumscription of *Gnidia* and allied genera.

Field: Taxonomy

Supervisors: Prof. J.S. Boatwright (UWC), Dr A.R. Magee (SANBI), Prof. J.C. Manning (SANBI)

University for registration: University of the Western Cape

Level: BSc Hons.
