CERTIFICATE OF INDEPENDENT QUOTATION DETERMINATION

1 This Standard Bidding Document (SBD) must form part of all quotations[1] invited.

2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).[2] Collusive bidding is a *per se* prohibition meaning that it cannot be justified under any grounds.

3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:

a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.

b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

[1] Includes price quotations, advertised competitive bids, limited bids and proposals.

[2] Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

Taxon expert input and verification for species pages (e-Fauna) for the South African National Biodiversity Institute (SANBI)

1. BACKGROUND

The South African National Biodiversity Institute (SANBI) is mandated to monitor and report on the status of biodiversity in South Africa (Section 49: NEM:BA, Act 10 of 2010). In partial fulfilment of the mandate, SANBI collects and collates foundational biodiversity information to feed into various assessments that inform, among others, the status and/or trends of biodiversity. At species level, this information is also shared with science/biodiversity students, practitioners and enthusiasts through the species pages in the e-Fauna project. SANBI lacks capacity and the level of expertise required to verify collated data for the animal kingdom. There is therefore a need to contract experts to input to the species pages, contributing to this important resource of the animal diversity of the country.

2. SCOPE OF WORK REQUIRED OF TAXA EXPERT

The experts will be required to verify compiled species page(s) and add expert knowledge, ensuring that the species pages represent a true reflection of current knowledge on the species at the time of publication. Information contained will include the taxonomic backbone, species descriptions, habitat, ecology and ecosystem classification, distribution, and supplementary fields (such as uses and exploitation, legislation, research needs, and the IUCN Red List status, if available).

The work is guided by the SANBI e-Fauna Policy and associated Standard Operational Procedures.

SANBI requires for experts to:

- Be informed of up-to-date knowledge and publications about the species or taxonomic group allocated
- Plan own work and liaise with SANBI to ensure that deadlines are met.
- Verify compiled animal species pages (e-Fauna pages), confirming scientific correctness and adding species information (including those not in the public domain)

SANBI requires the experts to work seamlessly with the Zoological Research staff members and collaborators. The experts should preferably have their own computer and reliable internet connection.

The experts will work closely with Dr Abram Maake, the Zoological Research Senior Scientist, and are expected to communicate with him regularly on progress.

3. Skills, competencies and other requirements

The experts are required to have:

- A Masters degree in Animal Taxonomy or equivalent qualification in Natural Sciences.
- Established research profile in either animal taxonomy, biological science, evolutionary biology, biosystematics, or other related disciplines.
- At least five (5) years' relevant work experience, with scientific writing, manuscript review/editing, and proof reading.
- At least three (3) first-authored taxonomic publications in reputable peer-reviewed journals.
- Knowledge of research and data norms/standards (e.g. International Code of Zoological Nomenclature) applicable to internationally acceptable standards.
- Familiarity with relevant reference materials, including books and scientific journals.

4. REQUIREMENTS FOR APPLICATION

Experts interested in contributing towards this project should submit a concise written portfolio that addresses the Scope of Work and the above requirements and outputs. The portfolio should include:

a) A description of your approach to collate and report scientific data/information, and the average number of days achieved per given target. Also include challenges encountered and approach used to overcome these.

b) An abbreviated CV, including relevant qualifications, skills, experience and track record (Certified copies of certificates will be required).

c) At least two to three examples of similar relevant projects/products the expert was personally responsible for producing in the last three years, preferably at least one relating to scientific reporting.

d) Contact details of at least three current or recent clients, preferably related to similar work.

Stop Fraud, Theft and Corruption without Fear or Favour - Call our Hotline 0800 434 373 Anytime

5. EVALUATION CRITERIA

In accordance with the National Treasury Instruction Note on the Amended Guidelines in Respect of Bids that Include Functionality as a Criterion for Evaluation (issued 3 September 2010), this bid will be evaluated in two stages:

The first stage will evaluate functionality according to the criteria listed in the table below:

Criteria for measuring functionality	**% Weight**
1. Relevant qualifications, skills and experience	40 total
2. Evidence of competencies: - Scientific writing and review - At least three (3) first-authored taxonomic publications in reputable peer-reviewed journals. - Examples of similar relevant projects/products the expert was personally responsible for producing in the last three years	40 total
3. Technical merit of the application: - Demonstrated understanding of animal taxonomy and nomenclature	20 total
TOTAL	**100**

Candidates who fail to score a minimum of 70 points out of a possible 100 points on the functionality criteria will not be eligible for further consideration.
