

# GSPC Targets: 2011-2020

## Objective I: Plant diversity is well understood, documented and recognized

**Target 1:** An online Flora of all known plants.

**Target 2:** An assessment of the conservation status of all known plant species, as far as possible, to guide conservation action.

**Target 3:** Information, research and associated outputs, and methods necessary to implement the Strategy developed and shared.

## Objective II: Plant diversity is urgently and effectively conserved

**Target 4:** At least 15 per cent of each ecological region or vegetation type secured through effective management and/or restoration.

**Target 5:** At least 75 per cent of the most important areas for plant diversity of each ecological region protected, with effective management in place for conserving plants and their genetic diversity.

**Target 6:** At least 75 per cent of production lands in each sector managed sustainably, consistent with the conservation of plant diversity.

**Target 7:** At least 75 per cent of known threatened plant species conserved *in situ*.

**Target 8:** At least 75 per cent of threatened plant species in *ex situ* collections, preferably in the country of origin, and at least 20 per cent available for recovery and restoration programmes.

**Target 9:** 70 per cent of the genetic diversity of crops including their wild relatives and other socio-economically valuable plant species conserved, while respecting, preserving and maintaining associated indigenous and local knowledge.

**Target 10:** Effective management plans in place to prevent new biological invasions and to manage important areas for plant diversity that are invaded.

## Objective III: Plant diversity is used in a sustainable and equitable manner

**Target 11:** No species of wild flora endangered by international trade.

**Target 12:** All wild-harvested plant-based products sourced sustainably.

**Target 13:** Indigenous and local knowledge, innovations and practices associated with plant resources, maintained or increased, as appropriate, to support customary use, sustainable livelihoods, local food security and health care.

## Objective IV: Education and awareness about plant diversity, its role in sustainable livelihoods and importance to all life on earth is promoted

**Target 14:** The importance of plant diversity and the need for its conservation incorporated into communication, education and public awareness programmes.

## Objective V: The capacities and public engagement necessary to implement the Strategy have been developed

**Target 15:** The number of trained people working with appropriate facilities sufficient according to national needs, to achieve the targets of this Strategy.

**Target 16:** Institutions, networks and partnerships for plant conservation established or strengthened at national, regional and international levels to achieve the targets of this Strategy.
