It feels like we just started the year yet we are at the end of the first quarter of 2021 already. Time certainly moves steadily ahead with 2021 being the final months of implementation for the Biodiversity and Land Use project, and we still have some work to do before the project ends. READ MORE

In view of the Land Reform and Biodiversity Stewardship Initiative’s 10 year anniversary in 2019, a strategic review of the Initiative was recently concluded; aimed at providing insights and recommendations on how the initiative can be supported and strengthened. For the key finds of the review … READ MORE

Protected Areas require adequate, sustainable financing and capacity resourcing, now more than ever under the Covid-19 crisis. The amendment of section 37D of the Income Tax Act, No. 58 of 1962 is one such innovative finance source for Protected Areas. READ MORE

Preliminary findings of a review undertaken by the BLU project on Spatial Development Frameworks indicates that the uptake of biodiversity information into these plans have significantly improved. Mainstreaming biodiversity into land use regulations and management is a key focus for the project. READ MORE

Through management plans, improved land and natural resource management practices are implemented. For the Hexriver Complex, this process is now more user friendly. READ MORE

The SAFAS has taken great strides during this Covid-19 lockdown towards level-ling the certification playing fields in the forestry sector, through a system that allows growers access to markets requiring certification. READ MORE
