90(1 - \frac{P_t - P_{\text{min}}}{P_{\text{min}}}) & \text{for } 90/10 
\end{cases} 
\]

- \( Ps \) = Points scored for price of tender under consideration
- \( P_t \) = Price of tender under consideration

4.2. In cases where organs of state intend to use Regulation 3(2) of the Regulations, which states that, if it is unclear whether the 80/20 or 90/10 preference point system applies, an organ of state must, in the tender documents, stipulate in the case of—

   (a) an invitation for tender for income-generating contracts, that either the 80/20 or 90/10 preference point system will apply and that the highest acceptable tender will be used to determine the applicable preference point system; or

   (b) any other invitation for tender, that either the 80/20 or 90/10 preference point system will apply and that the lowest acceptable tender will be used to determine the applicable preference point system,

then the organ of state must indicate the points allocated for specific goals for both the 90/10 and 80/20 preference point system.

The South African National Biodiversity Institute (SANBI) wishes to appoint a consultant on a 3-month contract to provide support to the SANBI-GBIF Node in doing a review of the data use and application of biodiversity data generated by the South African community and especially through funded investments of the Foundational Biodiversity Information Programme

These efforts will inform a more comprehensive understanding of the use and impact of biodiversity data published at the national level, and its relevance for science and policy impact

1. Background

SANBI hosts the South African Node of the Global Biodiversity Information Facility (GBIF). The efforts of SANBI-GBIF are guided by a number of key strategic objectives, this includes Promoting the sharing of data and information under a common set of standards 2. Contributing to education, training, and capacity development for promoting national access to data 3. Advising on national and international initiatives 4. Facilitating marketing and awareness raising of the benefits and applications for end users

The Node is guided by and contributes to SANBI’s corporate strategic plan, the SANBI Regional Engagement Strategy for Africa and the GBIF Strategic Implementation Plan. These strategic frameworks give direction and alignment to efforts to grow biodiversity informatics networks and capacities, strengthen technical skills, data management and publishing competency and increase the use and uptake of biodiversity data and information, in support of scientific research and sustainable development.
One of SANBI-GBIF’s key roles is to mobilize biodiversity information and make it freely available on the internet, www.sanbi-gbif.org. Currently more than 30 000 000 biodiversity data records have been mobilized through the South African GBIF Node partners and published to GBIF. This is important to ensure that researchers, conservation planners and decision-makers can use the information to make informed decisions that contribute to South Africa’s sustainable development. It is critical that core skills are also developed to further mobilise, manage and use this biodiversity data for research and effective decision making. Here, the Foundational Biodiversity Information Programme, also plays a key role in the funding of research which generates and mobilises biodiversity data.

2. Objectives of work

The SANBI-GBIF Node requires written quotations for the assessment of the use and impact of biodiversity data, over a period of 3 months. This work will cover a review of the data which has been published from the South African community, an analysis of the citations and consideration of other products which has been generated from the data. The assessment will include the design and preparation of relevant outputs such as reports, analysis, infographics etc based on the assessment, although ideally, will not be restricted to this output.

3. Scope of work and requirements of the service provider

Service Provider Functions:

- Design and prepare an approach to evaluate the data use and citation landscape of data published by the South African biodiversity science community to GBIF.
- Review and analysis of data use and citations of data holding institutions in South Africa, which may not have published relevant data to GBIF.
- The service provider will be required to engage with relevant identified organisations and data providers following the initial analysis, to conduct interviews to gain an understanding of impact of the data. This may be conducted with the DD: Biodiversity Informatics & Partnerships.
- Design the interview questionnaire, or relevant engagement approach. The contractor will also be required to record the engagements and outcomes of the engagements.

Project Management Functions:

- To meet with the Deputy Director: Biodiversity Informatics & Partnerships to agree on the approach towards the synthesis of the data use cases and the citations efforts.
- To engage with the DD with regards the development of the report, which will form the foundations of other derived products.
- To liaise closely with the Deputy Director: Biodiversity Informatics Partnerships and Cooperation with regards to any queries or challenges that emerge from this work.

- Compilation of an evaluation report.
- The service provider will be required to attend an inception meeting, plus a progress meeting at least once or twice a month depending on the needs, as outlined below.
- After the inception meeting, an indicative project plan must be developed outlining the timeframes for expected tasks (in the 3 months), in line with the scope of work above.
