REQUEST FOR QUOTATION **TERMS OF REFERENCE**

THE SOUTH AFRICAN NATIONAL BIODIVERSITY INSTITUTE REQUIRES A PROFESSIONAL SERVICE PROVIDER FOR THE DEVELOPMENT OF AN INTEGRATED WILDFIRE MANAGEMENT PLAN AT THE KIRSTENBOSCH AND HAROLD PORTER NATIONAL BOTANICAL GARDENS

1. Background and Discussion

The Department of Forestry, Fisheries and the Environment (DFFE) has allocated funds over the 2023/24 to 2025/26 Medium Term Expenditure Framework (MTEF) towards a national infrastructure programme at the various campuses and sites of the South African National Biodiversity Institute (SANBI). The programme includes infrastructural maintenance, refurbishments, upgrades, replacements and/or new infrastructure at all sites. Projects have been identified for implementation over the MTEF at each of the SANBI's existing campuses and sites across the country.

The Kirstenbosch National Botanical Garden estate comprises 528 hectares of which 36 hectares is cultivated garden display areas with thematic beds, lawns, paths, picnic areas and various visitor amenities. The natural estate which fronts the steep eastern slopes of Table Mountain consists of afrotemperate forests, granite fynbos and includes three perennial mountain streams. There are five popular trails found at Kirstenbosch which meanders through the forested parts of the estate as well as longer and more challenging hiking trails that begins at Kirstenbosch and passes over onto the Table Mountain National Park which share a common boundary with Kirstenbosch. These trails and hiking routes are very popular throughout the year peaking in Spring and Summer and therefore raises important safety risks around wildfires and the potential threats they pose to humans, wildlife and the local indigenous vegetation. Given that the natural estate is withing close proximity to many buildings and other visitor facilities, the danger of wildfires is an important aspect which needs to be addressed by way of an integrated wildfire management plan. In addition, Kirstenbosch is a UNESCO declared World Heritage site and therefore requires appropriate risk mitigation against threats such as wildfires and the potential loss of life and property not only to Kirstenbosch but also to neighbouring properties.

The Harold Porter National Botanical Garden comprises of 201ha of which 10ha are cultivated thematic garden displays, lawns, concert area, pathways and lawns. The Garden is located in the Kogelberg Biosphere Reserve and the area is internationally recognised as a Fynbos hotspot. A section of the natural estate borders with CapeNature's Kogelberg Nature Reserve and this area consists of Afromontane forest, fynbos and 2 natural waterfalls. The Garden is well known for its trails on the natural estate, especially the trail we share with the Kogelberg nature Reserve. The Garden is unique as it stretches from mountain to sea and is divided by the R44 (Clarence Drive). The lower portion of the natural estate does not have any formal trails that are maintained by the Garden, however is used by locals. These trails are very popular especially during Spring and the Summer peak seasons and therefore raises important safety risks around wildfires and the potential threats they pose to humans, wildlife and the local indigenous vegetation. The Hangklip-Kleinmond area, in which the Garden is located, is one of the fastest developing holiday /residential areas in the Overberg and because of this and the fact that the Garden is prone to veld fires it is imperative that an integrated wildfire management plan is developed for the Garden.
