1. Background

South African National Biodiversity Institute (SANBI) manages a network of national botanical gardens throughout the country. Pretoria National Botanical Garden (PNBG) is surrounded by urban development and offers a much-needed outdoor experience and wildlife in the eastern suburbs of Pretoria. The ridge that runs through the garden, the natural grassland and large lawned areas containing theme gardens of indigenous plants, offer a habitat for our indigenous wildlife species. Our garden is visited by millions of tourists annually.

The garden is 76 hectares of which fifty hectares of the total area are devoted to developed gardens, using almost exclusively South African plants. All the flowering plant species to be seen including 50% of the country's tree species, make this Garden a botanical tapestry, offering the visitor a glimpse of different biomes such as Savanna, forest, fynbos and some plants of other biomes.

A 35 m high quartzite outcrop divides the garden into two sections. Its frosty south-facing section and the north-facing, warmer section present two different worlds to the visitor and botanist. A paved nature trail gives access to the fascinating natural vegetation on the ridge, which boasts a diversity of indigenous fauna and flora. The garden is and is open to the public 365 days a year from 8:00 – 18:00 with entry limited until 17:00.
