CALL FOR EXPRESSION OF INTEREST

Issued by the Directorate on Biodiversity Evidence

South African National Biodiversity Institute

Contract number: Q10655/2024

TERMS OF REFERENCE

Clearing of Invasive Alien Plants: *Diplocyclos palmatus* in Pietermaritzburg and Hillcrest areas, KwaZulu Natal

Contractor to respond with Expression of interest by: 05 August 2024 to s-scm-quotations@sanbi.org.za with a copy to Ms. Tryphina Lubisi at t.lubisi@sanbi.org.za

Background and overview of the task

The Directorate on Biodiversity Evidence (DBE) of the South African National Biodiversity Institute (SANBI) targets localized invasive alien species. These species have not reached their full invasive potential and occur as relatively small populations. Removal of these populations at an early stage of invasion will limit spread to other areas, save on future costs of control, and contribute towards the eradication of these species from South Africa.

SANBI is targeting *Diplocyclos palmatus* in Pietermaritzburg and Hillcrest areas, KwaZulu Natal Province

Duration of the Contract and Contract budget:

This contractor will be appointed over duration of two financial years (2024- 2025 & 2025-2026). Table 1 below stipulates the number of days required per financial year. In the event of contract commencing later than planned, due to uncontrolled variables, the contractor may be required to implement catch-up plans and increase team sizes.

- The contract budget for 2024 – 2025 is calculated using Working for Water's National Resource Management rates (see Table 2 on page 2). The contract budget for the 2025 – 2026 financial year will be calculated using Working for Water's National Resource Management rates provided by the Department (NRM).
- The total contract cost will be calculated using the daily contract cost multiplied by the total number of workdays.
- The daily contract cost is dependent on the following variables: (i) Team size, (ii) working methods, (iii) the actual distance the contractor and Team must travel to project sites, and (iv) whether the contractor will claim value-added tax (VAT).
- Only the actual cost of medical examinations, wages for training days attended can be claimed and transport on specified daily allowance.

- (2) Clear all alien plants listed in Table 3 that were found during the survey.
- (3) Collect data as specified.
- (4) Where a contractor completes work ahead of schedule, new species and locations may be added to Table 3.

Table 3: Species and locality list

Financial Year	Species name	Locality	Population size in ha

2025 -2026	Species name will be confirmed prior to the project inception.	Localities will be confirmed prior to the project inception.	Population Size will be confirmed prior to the project inception.

GPS coordinates of the above localities and species will be supplied to the successful service provider.

Training: The contractor and his/her team are required to attend the following training:

Table 4: Training requirements

Financial Year	Course name and level		Duration in days	No. of beneficiaries
2024 - 2025	1.Herbicide Applicator		3	12

	3.Health and Safety		2	2
	4.Induction		1	12
2025 -2026	Training, duration and number of beneficiaries to be confirmed prior to the project inception.			

SANBI will cover the cost for all training.

Pre-medical examinations: Due to the rough terrains that some teams are required to work in, the contractor and their Team will need to undergo medical examinations before work commences. Only workers that have been declared ‘fit for work’ by an occupational health practitioner will be allowed on the Team. SANBI will reimburse the cost for medical examinations.

Monitoring: Clearing operations will be carefully monitored by the SANBI staff and the landowner where applicable.

Team make-up: This work requires a physically fit team of 12 people (qualified team leader (contractor or supervisor) with 6 Herbicide Applicators, 1 Driver, 2 Health and Safety reps and 2 First Aiders), who have had previous experience in clearing invasive alien plants. In the 2025 – 2026 the team make up maybe adjusted as per the requirements.

- Record data from each cleared population on the data collection sheets and suitable electronic devices. Null record data must be collected by setting tracks to “tracks log”.
- Completed sheets, GPS tracks, and points are to be submitted to SANBI at agreed intervals. Careful data collection is vital. Data collection and clearing methods differ for each species. Specifications on data collection and clearing methods will be discussed during the training provided by SANBI.
- Ability to use a GPS to record the locality of invasive alien populations and clearing operations is advantageous.
- Cleared material must be disposed of safely, as per instructions from the SANBI.
- The team driver should be in possession of a valid driver’s license and PDP to transport the Team to and from sites and should always be onsite during the duration of the contract.
- The Team must have a sound level of physical fitness and be able to work in difficult terrain and dense vegetation.
- Adequate supervision of the work is essential.
