Normal Climatic Conditions shall be deemed to include normal rainfall and associated wet conditions and materials, strong winds, and extremes of temperature. However, if delays to critical activities exceed the number of working days listed below for each month, then abnormal climatic conditions shall be deemed to exist, and an extension of time shall be granted in accordance with the provisions of that Clause. The number of days quoted below shall be regarded as a fair estimate of the delays to be anticipated and allowed for under normal climatic conditions, where inclement weather prevents or disrupts work on the critical path. <table><tr><td>January</td><td>9 days</td><td>May</td><td>5 days</td><td>September</td><td>6 days</td></tr><tr><td>February</td><td>9 days</td><td>June</td><td>4 days</td><td>October</td><td>9 days</td></tr><tr><td>March</td><td>10 days</td><td>July</td><td>4 days</td><td>November</td><td>9 days</td></tr><tr><td>April</td><td>8 days</td><td>August</td><td>5 days</td><td>December</td><td>10 days</td></tr></table> Claims for delays for abnormal climatic conditions shall be accompanied by substantiating facts and evidence, which shall be submitted timeously as each day or half-day delay is experienced. Should an extension of time be granted by the Engineer, such extension of time will be added to the Time for Completion. C2 Pricing Data

1. GENERAL INFORMATION

- a. Bills of Quantities
The **bills of quantities** form part of and must be read and priced in conjunction with all the other documents forming part of the **contract documents**, the Standard Conditions of **TENDER**, Conditions of Contract, Specifications, Drawings, and all other relevant documentation.
- b. Value Added Tax
The **contract sum** must include Value Added Tax (VAT). All rates, provisional sums, etc. in the **bills of quantities** must, however, be net (exclusive of VAT) with VAT calculated and added to the total value thereof in the Final Summary.
- c. Fixed Price Contract
Service Providers are to take note that contract price adjustments do not apply to this contract. Service Providers should therefore make provision in the **contract sum**, schedule of rates, etc., for possible price increases during the contract period, as no claims in this regard shall be entertained.
- d. Emergency Call out
In the event of any emergency call out the normal procurement process shall follow after completion of work completed. The service provider shall submit a quotation for the work completed for a purchase order to be generated. The invoice shall then be issued to the client after receiving the purchase order.

2. PRICING INFORMATION

1. These schedules of quantities contain sequentially numbered pages as indicated in the contents list. Service Providers are required to check that the pages in their schedules of quantities are complete. If any pages are duplicated or omitted, or if any quantity or typing is unclear, or if the schedules of quantities contain any obvious errors, the Service Provider shall immediately notify the engineer so that the problem may be rectified. No responsibility for any errors arising from any of the above shall be accepted by the engineer.
2. The schedules of quantities form part of and shall be read in conjunction with the specification, which contains a full description of the work required to be performed and the materials and equipment to be supplied and used in the execution of the works. Service Providers shall refer to the specification for the full meaning and description of work to be executed and materials and equipment to be supplied or used in the execution of the work.
3. Tenders shall be submitted with schedules of quantities completed in full. Non or partial completion of the schedules of quantities shall render tenders liable for disqualification.
4. The total TENDER price as carried forward to the bid form, after correction for arithmetic extension errors, etc., shall be the contract price as awarded to the successful Service Provider. Service Providers are requested to check the multiplication and addition of the schedules of quantities. The rate submitted shall be regarded as the price offered per item.
5. No changes, additions, or omissions to the contents of the schedules of quantities shall be permitted. If any changes, additions, or omissions are made, these shall not be recognised, and the original wording of the schedules of quantities shall apply.
6. The priced schedules of quantities of TENDER shall be checked by the principal agent. The principal agent reserves the right to request adjustments to one or more individual TENDER prices and to rectify contradictions and thereby alter the total TENDER price as submitted. The acceptance of this TENDER does not preclude the principal agent from querying or requesting that the contractor adjust the rates at any stage during the contract period or any extension thereto.

7. The responsibility for the accuracy of the quantities included in the schedules remains with the person who prepared the schedules. The Service Provider is relieved from the responsibility of the measurement of quantities at the TENDER stage, and the TENDER amounts shall be for the quantities as listed in the schedules. It is, however, expected from the Service Provider to include minor construction items that would be required for the complete execution of works in accordance with the specification.
8. The quantities in these schedules of quantities shall not be used for the ordering of materials.
9. Changes in the scope of works included in the schedule of quantities shall be permitted and shall be measured and priced at the tariffs as included in the schedules of quantities and shall form an addition to or omission from the total of the schedule of quantities. Any changes not covered by any rates in the schedules of quantities shall be agreed and priced as non-schedule items in accordance with the conditions of the contract.
10. The extent and value of variations shall be in accordance with the conditions of the contract. Variations to the works before the execution thereof shall be priced as above. Variations to work already executed shall not necessarily be priced in accordance with the schedule of quantities and shall be judged individually on merit.
11. Except where the separate rate for the material and labour components of any item is specifically called for, the unit price of such item shall be deemed to include the supply and installation of that item.

The description of any items shall, except where otherwise specified, allow for the purchase, delivery, off-loading, storage, packing, lifting, placing, positioning and fixing in position, cutting and wastage, dies and patterns, models and equipment, temporary work, return of packing material, fixing costs, profit or other obligations of the contract arising out of the conditions of the contract.

All items' prices shall exclude VAT but include any other tax or levy as applicable.

All items are measured to the net final quantity as indicated on the drawings, with the completed work in the position as indicated on the drawing. All prices and rates shall allow for wastage for whatever reason, irrespective of any other standard measurement which may be currently used elsewhere.

12. Should the contractor identify any additional issues or items which, in his opinion, are necessary for the complete and proper execution of the works, he shall identify such items in a covering letter attached to his TENDER and submit rates for these items. Mistakes in the physical measurement of items in the schedules of quantities shall be rectified, but no claim shall be considered for the non-measurement of doubtful or minor items or claims resulting from criticism of the method of measurement used or descriptions given. The priced schedule of quantities shall not be adjusted on the grounds of the items which, in the opinion of the Service Provider, should have been brought into account unless so detailed in the accompanying letter.
13. The schedule of quantities shall be adjusted to reflect the quantities of materials used on completion of the whole or part of the works as a result of remeasurement, qualification, or variations. The remeasured quantities shall form the basis for the calculation of payment certificates. The schedules of quantities are not intended for the ordering of materials, etc., and the contractor is advised to extract the quantities for the ordering of materials directly from the drawings and specifications. Any order placed directly from the schedules of quantities shall be solely at the contractor's risk.
14. The unit rates as entered in the schedule of quantities, with the exclusion of dayworks items, shall in all cases include any present and applicable sales tax or similar statutory duties.

Annexure A Schedule of quantities
